## London City Airport Environment Policy

London City Airport (LCY) is located in East London and serves destinations in the UK, Europe and USA with a focus on business travel. LCY has a responsibility to continuously review its environmental performance in order to manage and minimise, where possible, the environmental impacts resulting from its activities. This is achieved by operating an environmental management system to an ISO: 14001 standard. LCY aspires to excellent standards across the business and is committed to ensuring a site-wide focus on environmental best practice.

### To achieve this objective LCY commits to:

- Continually seek to minimise to acceptable levels the environmental impact of LCY's operation. Assessing and mitigating all potential significant environmental impacts when improving or developing the airport.
- Ensuring LCY's environmental activities are safe for its employees, passengers, visitors and others who interact with the airport.
- Complying with all relevant environmental legislation and other requirements to which the airport subscribes.
- Taking a pro-active approach to managing and mitigating the environmental impacts of the operation of the airport by demonstrating continual environmental improvement and prevention of pollution at LCY.
- Undertaking a review of this policy from time to time to ensure it is documented, implemented, reviewed and maintained.
- Developing, implementing and reviewing environmental policies, objectives and targets in order to achieve continuous improvement.
- Undertake, set and review LCY's environmental objectives and targets.
- To make this policy available to all persons working for or on behalf of the airport and to the public.
- Providing direct employees of LCY with adequate training, where required, so they have a clear understanding of their environmental responsibilities and are competent to assist in the delivery of LCY's environmental targets.
- Establishment of the Environmental Steering group which regularly monitors progress against targets, reviews policies, develops strategies and co-ordinates the implementation of associated action plans.

The scope of this Environmental Policy only concerns those business activities, services and locations directly under the control of LCY. However, LCY acknowledges there are activities outside this scope which it can influence and will seek collaboration from stakeholders to operate in compliance with the principles within this policy.
